Paneele / Oberflächen

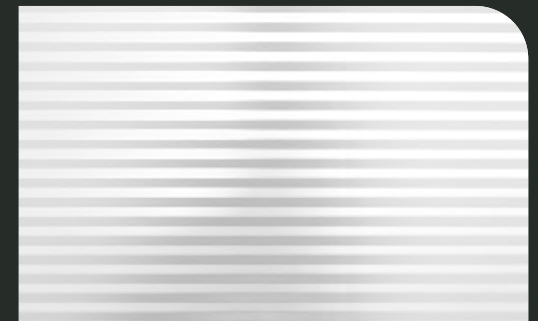

Silkline

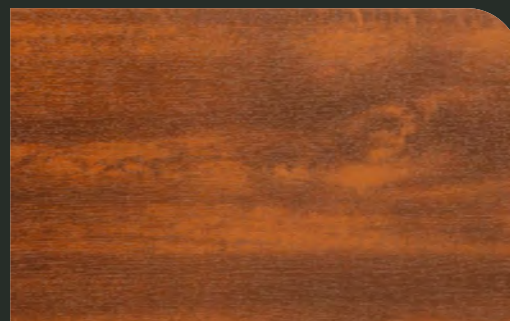

Woodgrain

Sandgrain

V-Sicke | Elegance

Woodline

Smoothgrain (Folie)

Paneele / Oberflächen

Der Klassiker: Die Oberfläche **Silkline** entspricht ihrem Namen entsprechend einer glatten & geschmeidigen Oberfläche.

SILKLINE

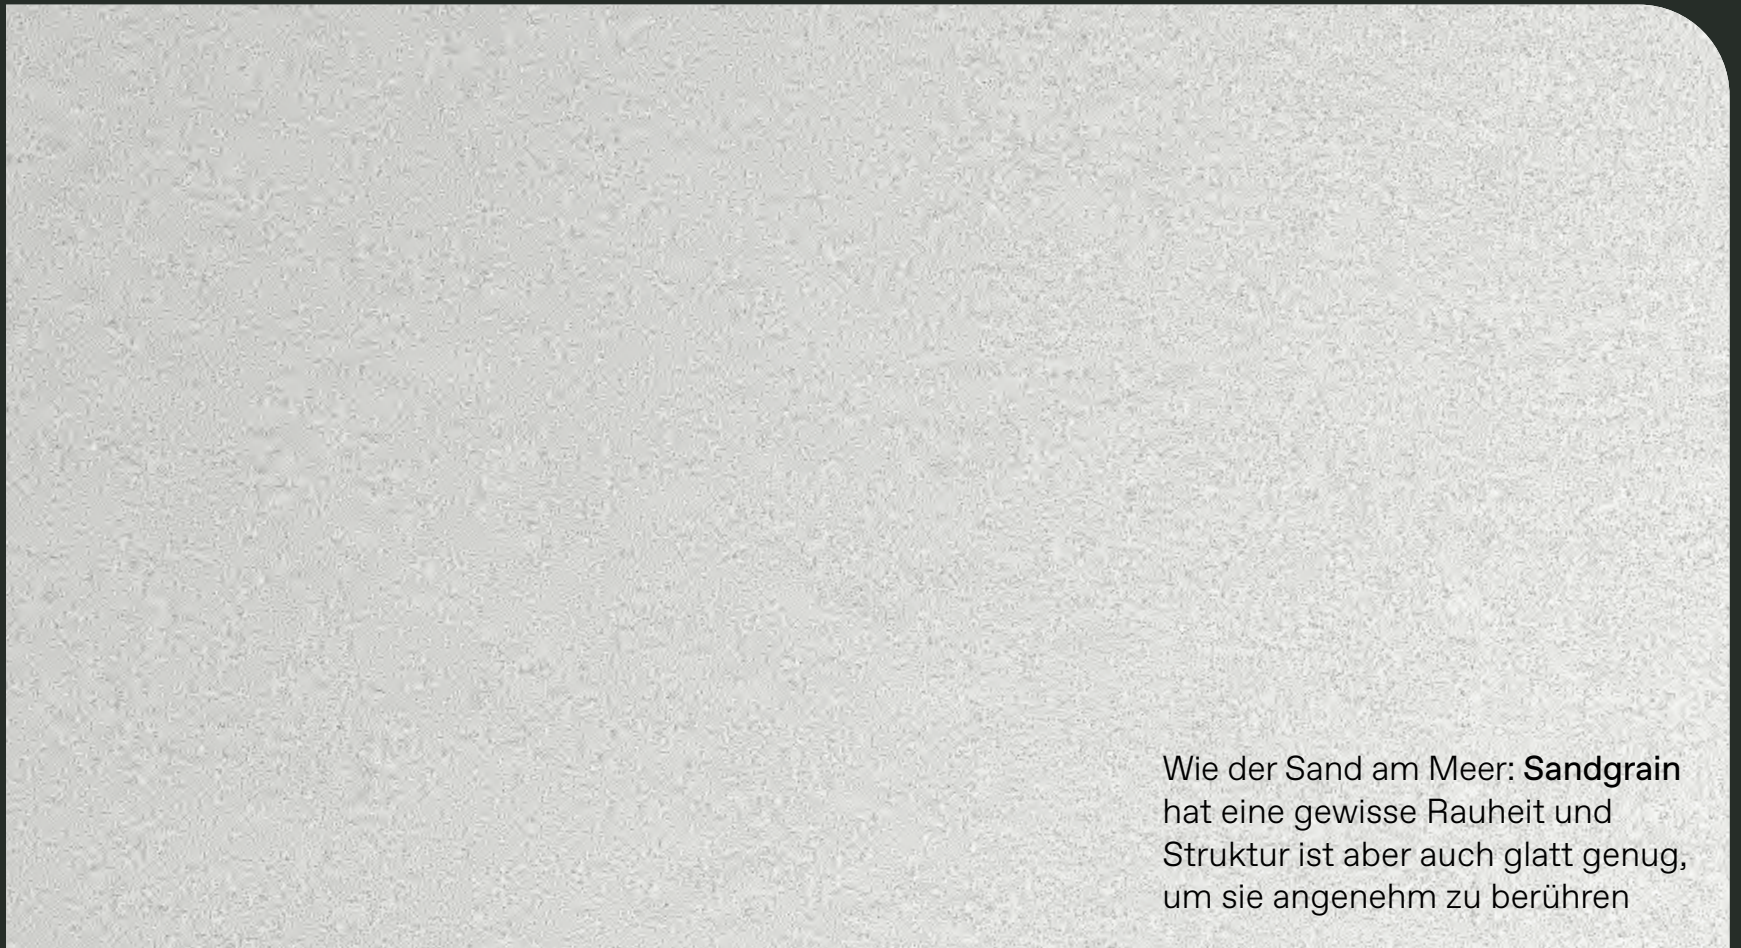

Paneele / Oberflächen

Einfach mal anders: **Woodgrain** ähnelt einer Holzoberfläche, die eine interessante Mischung aus Glätte und Struktur bietet und je nach Lichteinfall und Betrachtungswinkel unterschiedliche Effekte erzeugen kann.

WOODGRAIN

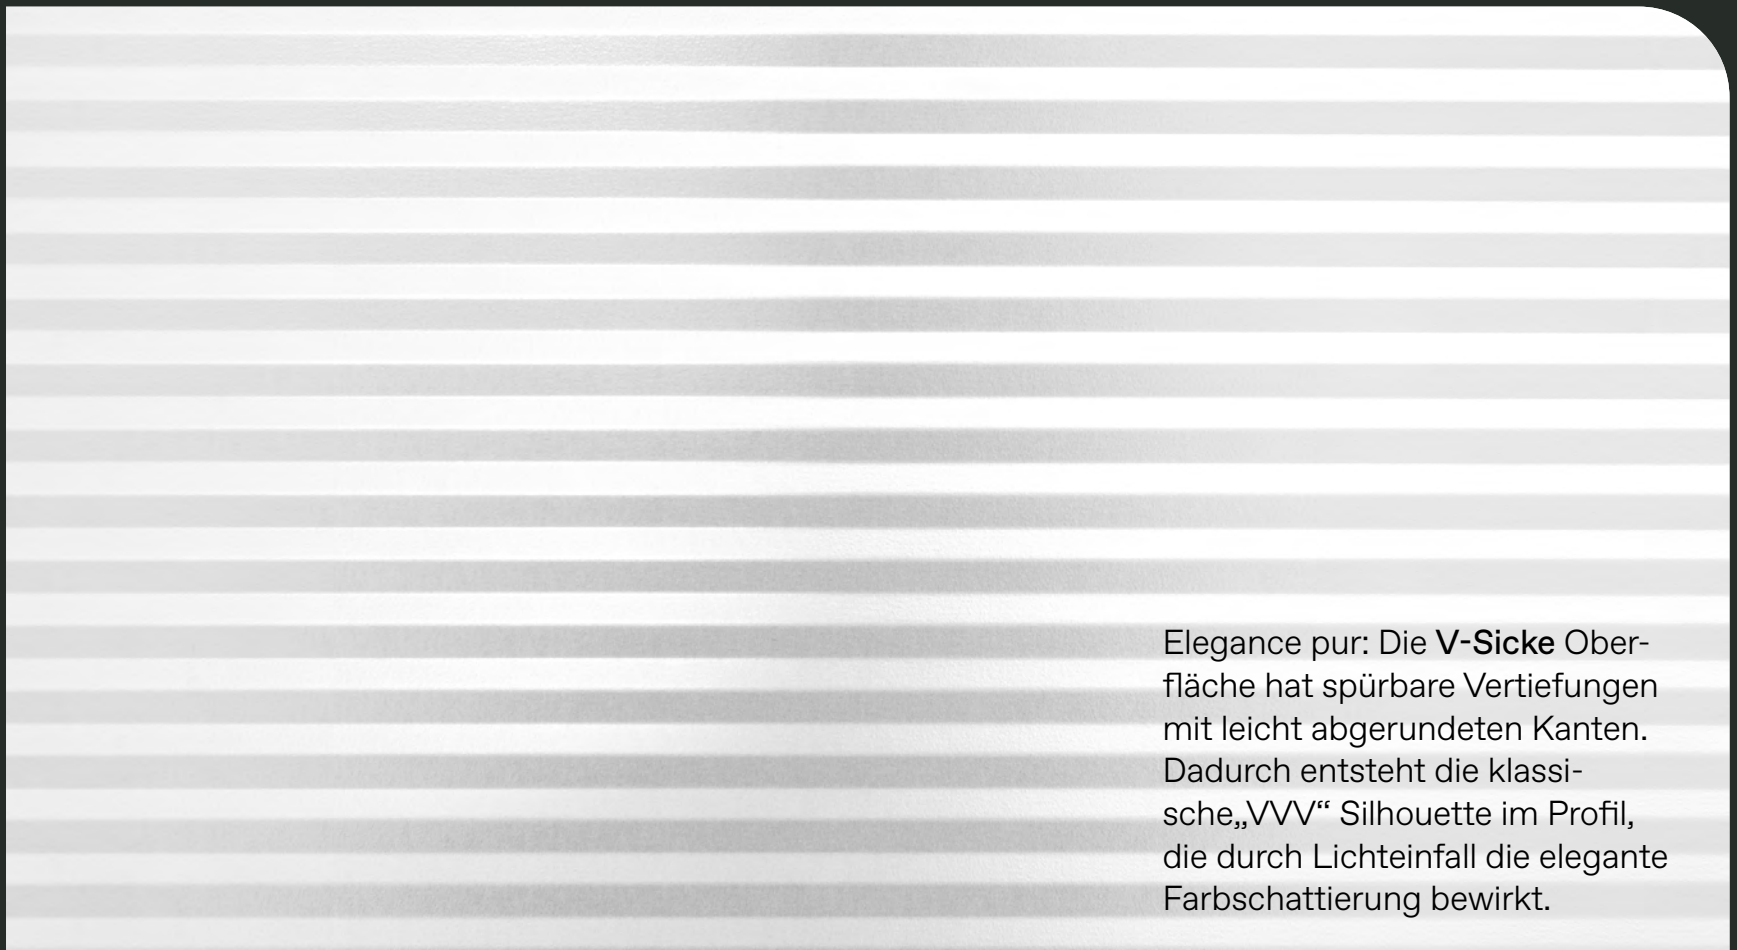

Paneele / Oberflächen

Wie der Sand am Meer: **Sandgrain** hat eine gewisse Rauheit und Struktur ist aber auch glatt genug, um sie angenehm zu berühren

SANDGRAIN

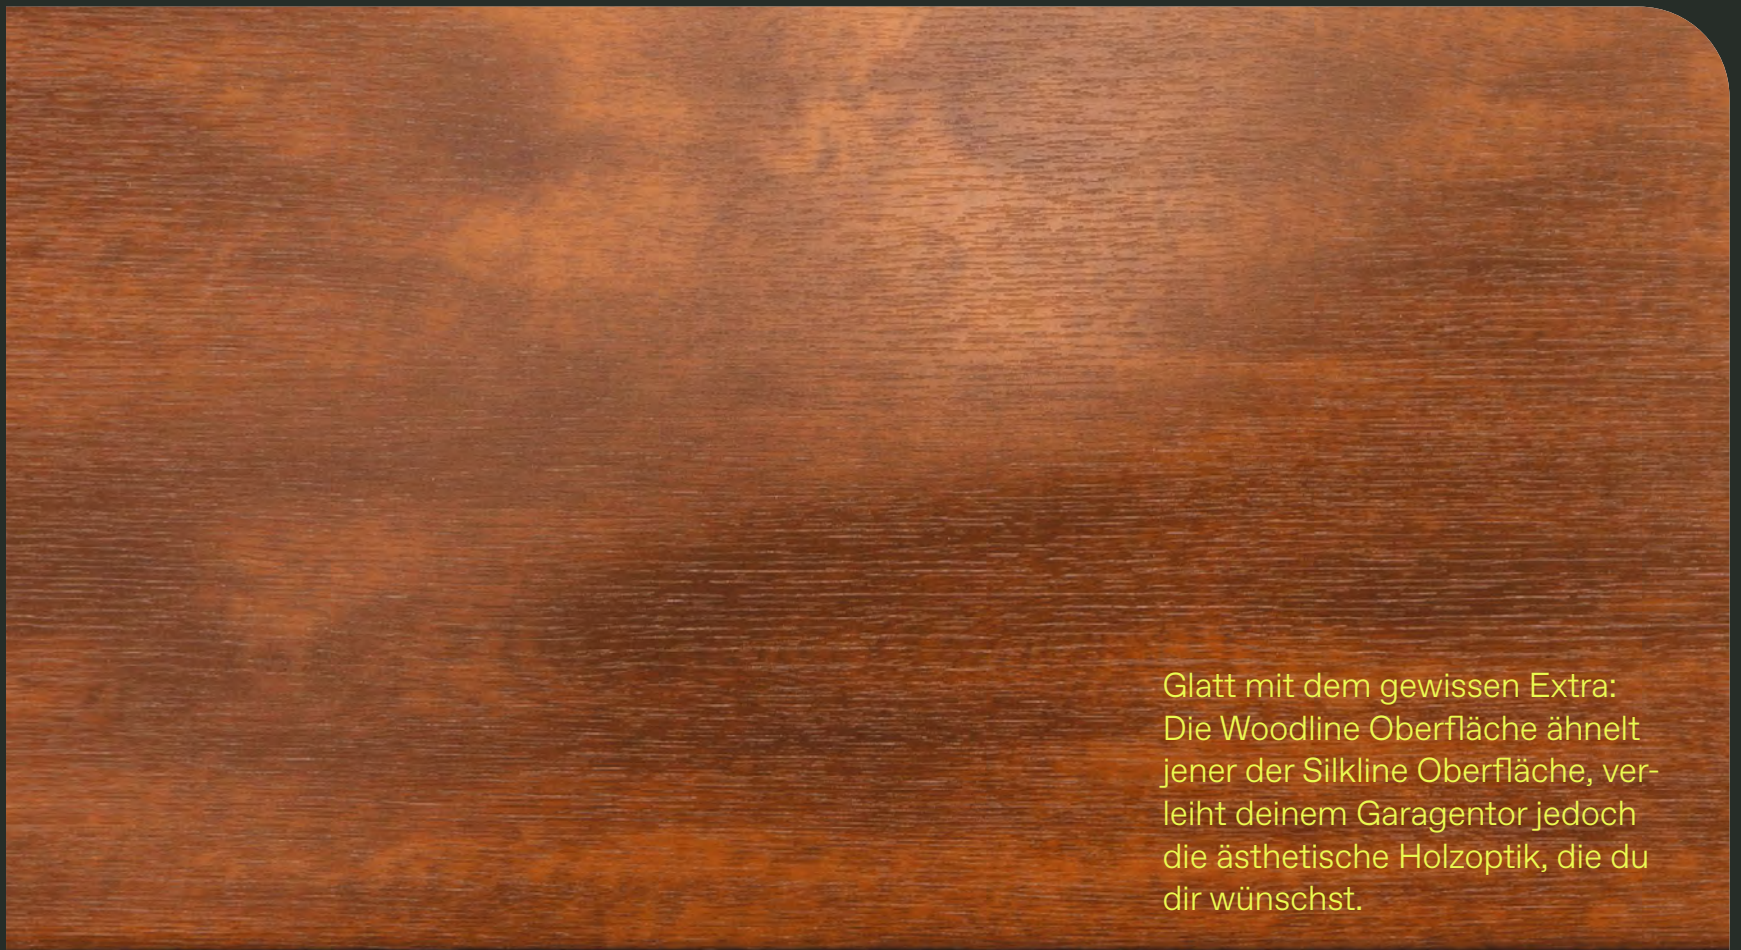

Paneele / Oberflächen

Elegance pur: Die **V-Sicke** Oberfläche hat spürbare Vertiefungen mit leicht abgerundeten Kanten. Dadurch entsteht die klassische „VVV“ Silhouette im Profil, die durch Lichteinfall die elegante Farbschattierung bewirkt.

V-SICKE | ELEGANCE

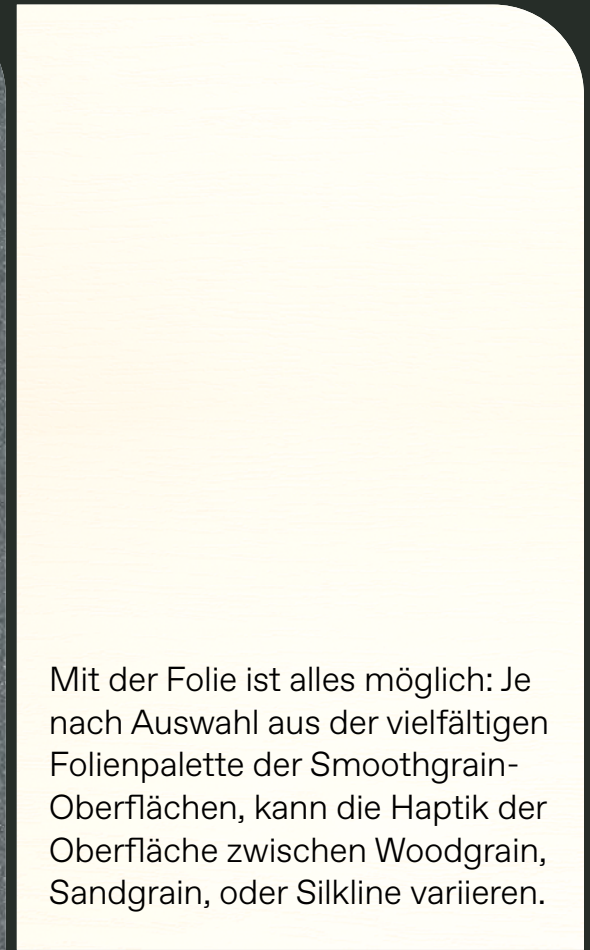

Paneele / Oberflächen

Glatt mit dem gewissen Extra:
Die Woodline Oberfläche ähnelt
jener der Silkline Oberfläche, ver-
leiht deinem Garagentor jedoch
die ästhetische Holzoptik, die du
dir wünschst.

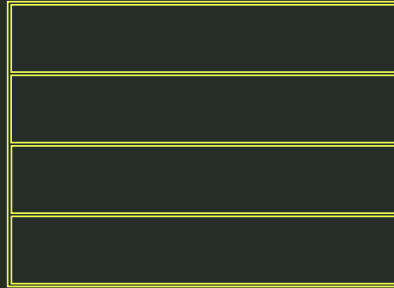

WOODLINE

Paneele / Oberflächen

Mit der Folie ist alles möglich: Je nach Auswahl aus der vielfältigen Folienpalette der Smoothgrain-Oberflächen, kann die Haptik der Oberfläche zwischen Woodgrain, Sandgrain, oder Silklime variieren.

SMOOTHGRAIN (Folie)

L-Sicke

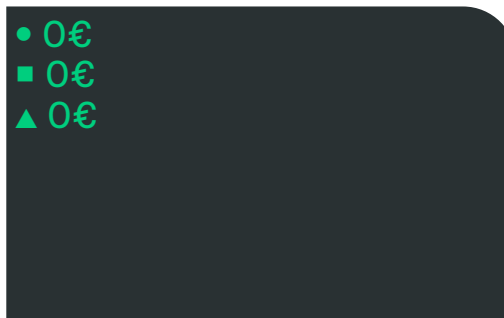

Die beliebte L-Sicke zeichnet sich durch ihre Großlamelle ohne Prägung aus. Eleganz trifft Design.

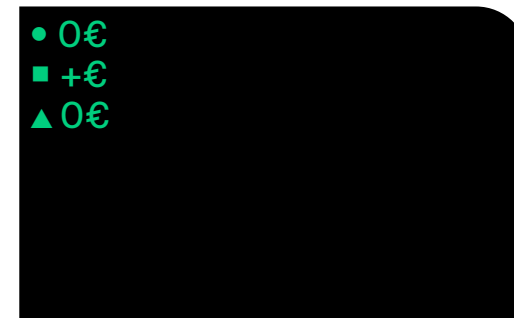

L-Sicke / Silkline
